Natural Saddle west side

Bostwick Creek
Bridger Range
3/2/2019
Code
HS-N-R3-D3.5-O
Elevation
8800
Aspect
NW
Latitude
45.79640
Longitude
-110.93800
Notes

From BBSP on 3/2/19: "Large natural avalanche pulled out last night/early morning on the backside of north peak of saddle peak in Bostwick canyon, the slide path is known as the 'Y' to local skiers and hasn't run this year, or been skied. Crowns looked to be 3-6ft, it ran further than anything i've seen there in the past decade, knocking over small trees and some old standing dead in the run out. R3 D3.5."

Number of slides
1
Number caught
0
