Wind slab in tobacco roots

Date
Sun, 04/21/2024 - 11:15
Activity
Skiing

Toured up around bell lake today and after a night of wind, triggered a very small wind slab in a north facing couloir at around 9500-10000ft. It was almost 10” deep and was about 10-15ft across. Snow was being loaded through out the day and was staying cold up high.

Region
Out of Advisory Area
Location (from list)
Bell Lake
