Beehive Basin Observations

Date
Tue, 01/23/2024 - 15:50
Activity
Skiing

From email: "AAI Pro 1 course to Beehive Basin. One of the students stomped on a lower angle slope directly above a large test slope. On the second stomp the slope released. West aspect at about 8000'. SS-ASc-R3-D1.5-O

18 pits were dug by students and all had ECTP results scoring 15 or lower, and most scoring less than 10, failing on small facets down 20-40cm. PST 22/100 end and 40/100 end. Rutschblock RB3. HS 60-80cm, E and W aspects at about 8500'. Surprisingly, we didn't find SH in any of our pits. Some localized cr, co while breaking trail."

Region
Northern Madison
Location (from list)
Beehive Basin
Observer Name
Nina Hance
