Arden Peak slide

Date
Sun, 03/03/2024 - 16:25
Activity
Skiing

Shot from the top of Flanders, ~1400 this afternoon, 3/3/2024. Big slide(s) on Arden and in Maid of the Mist.

Looks like the skin track and ski track between the two slides got taken out. At first glance from across the way it looked like the skin track was crossing over the debris, but when zoomed in it looks like the debris overran the skin track and the ski track.

Region
Northern Gallatin
Location (from list)
Maid of the Mist
Observer Name
Matt Zia
