Bison triggered Avalanche in YNP?

Out of Advisory Area
12/17/2019
Code
SS-AW
Latitude
44.92680
Longitude
-110.45100
Notes
From an email:
Upper Elk Creek, E. aspect, 8,200 ft
Debris looked pretty fresh, Who knows, but could have been triggered either directly or remotely by bison. The disturbance to lookers left (at bench) is due to bison - they are not cryptic animals!
Number of slides
1
