Avalanche activity Goose Lake

Date
Fri, 03/17/2023 - 16:00
Activity
Skiing

A few recent slides were visible today on south, east and west aspect around goose lake zone. Looked like mostly wind slabs in the new snow. Pit on East aspect was deeper than three meter probe. Showed relatively right side up pack in the first meter. ECTN 23 about 20 CM down. No other signs of instability observed.

Region
Cooke City
Location (from list)
Goose Lake
