Cooke City snow obs and widespread collapsing

Date
Fri, 12/08/2023 - 15:40
Activity
Skiing

From email:

"We skied in Republic Creek and Hayden Creek today.

No avalanche activity observed, but we had very widespread collapsing (about 20 large thunderous ones), on all aspects, primarily in the upper elevations.

Snowpit attached from a west aspect at 9700'. HS: 90. ECTP3 @ 54."

Region
Cooke City
Location (from list)
Republic Creek
Observer Name
Beau Fredlund
