Photos of a Recent Avalanches S. of Cooke City

Date
Sun, 02/18/2024 - 17:40
Activity
Skiing

From email: "Noted several 1-2 day old dry loose in steep terrain above the cliffs to the lookers left of Hang Ten. Also A large avalanche. crown propogated through the cliffs and looked to be about 200' wide and 1 1/2-2 ft. deep. Debris was no longer visible so I suspect this ran sometime during or shortly after the storm. (02/15)."

Region
Cooke City
Location (from list)
COOKE CITY
