Skier triggered slide north of Big Sky

Northern Madison 2/27/2019 Code SS-ASc-R1-D1-I Elevation 7500 Aspect Range **ESE** Notes From an email: "...ski cut this little 100' convex roll slope that is 35 degrees for its majority. It slid as expected. ESE facing @ 7500' prominent wind loading from SW. Did not step down through the harder wind crusts. 1-2' deep and 50' wide, ran 100'. Storm snow was getting very upside-down with moderate SW heavily loading E aspects." Number of slides Number caught Number buried Avalanche Type Soft slab avalanche Trigger Skier Trigger Modifier c-A controlled or intentional release by the indicated trigger R size 1 D size **Bed Surface** I - Interface between new and old snow Problem Type Wind-Drifted Snow Slab Thickness 24.0 inches Vertical Fall 100ft Slab Width 50.00ft **Images** Skier triggered slide north of Big Sky_2 Skier triggered slide north of Big Sky_1 Slab Thickness units
