

Avalanche on Woody Ridge

Date

Mon, 01/29/2024 - 16:00

Activity

Skiing

West facing slope 9600' on Woody Ridge, North of the "Ozarks." Appeared to be new 1/29. Observed numerous older crowns and avalanches on all aspects throughout the day. Lots of whoomping and collapsing, enough to shake small trees. Sorry the images aren't great.

Region

Cooke City

Location (from list)

Woody Ridge

Observer Name

Nick Gaddy
