## **Natural Avalanche in Beehive Basin**

Date Sun, 03/03/2024 - 14:15 Activity Skiing

Noticed the pictured recent avalanche on an east facing aspect in the alpine of Beehive Basin. I would estimate it at a D2 size slide. It seems to have been naturally triggered by cornice fall and likely stepped down to older faceted snow deeper in the snowpack.

Region Northern Madison Location (from list) Beehive Basin Observer Name Eric Heiman
