

I K P 1F 4F F Notes: See pit from 11-27 in this area at: http://www.mtavalanche.com/images/13/goose-creek-pit?size=\_originalWe found surface hoar on Henderson Died. It was at the exact same location. HS there was 165cm and stability test result was ECTP17/13. All other layers in this pit felt solid and it v easy to miss the surface hoar without a stability test.

Advisory Region Cooke City
