Code
HS-NL-R2-D2-O
Elevation
9900
Aspect
E
Latitude
45.26300
Longitude

From obs 3/20/23: "Yesterday we toured up into Emigrant gulch. At around 2pm we observed a small point release on the East face of Emigrant, either a small <u>cornice</u> break or wet loose, that ran for about 200ft before <u>stepping down</u> to a deep <u>slab</u> that appeared to be about 3ft deep and 100ft across."
